

VIOLENT BEHAVIOR PREVENTION

ASSESS – MITIGATE – DEFEND

1 ASSESS THE SITUATION

You need to know how bad the situation really is. Our Threat Assessment & Management Experts will assess the situation to understand the perceived Justifications, Alternatives, Consequences, and Abilities (JACA) from the perspective of the Person of Interest (POI). Some or all of these methodologies are used to help experts determine levels of risk:

- Interviews with the potential victim(s)
- Interviews with others who have information, sometimes an interview with the POI
- A thorough background check to discover information through public and paid resources
- Internet and social media research.

2 DE-ESCALATION

De-escalation and mitigation strategies customized to your specific needs. Just as each potentially violent situation is different, your organization is unique in its culture, policies, resources, and risk tolerance. For you, our experts will recommend the right tactics to de-escalate and mitigate each situation so that the risk is minimized or is completely eliminated. We tailor guidelines for you to utilize in your organization so that you have standardized, pre-approved, strategies and tactics to consider for low-medium-and high risk situations you may face in the future.

3 PERSONAL SAFETY TIPS

Get the information you need right now to make sure you, your family, your employees and coworkers are safe at work, home, and while in public. Our experts have kept people safe for decades and will provide you with a few simple principles to increase your situational awareness and actions you can take to make all the difference in both feeling safe and being safe.

VIOLENT BEHAVIOR PREVENTION

ASSESS – MITIGATE – PROTECT

4 INTRUDER DEFENSE TRAINING

Do you and the people around you know what to do? What if the POI came to your office... or your home while you are away at work? We will come to your office and home to show you how to improve the physical security of your residence and office. Through age-appropriate discussions, our experts teach you and your family how to defend yourselves at home in the event of an intruder. We'll show you how to improve your family's privacy by reviewing your social media presence, privacy settings, and more to determine how much of your private and confidential information is publicly available, placing you at increased risk.

5 ON-SITE SECURITY PERSONNEL

To protect you through the most critical high-risk times of your threat situation-usually the first two weeks - we will help you determine if a highly-trained security professional is needed at your office or residence to protect you and your family. If you travel, know your family is safe while you are away.

6 SECURITY - TRAINED DRIVER / EXECUTIVE PROTECTION AGENT

If the threat level warrants, a highly-trained and professional Certified Security Driver or Executive Protection Agent will allow you to concentrate on your business and family while adding layers of protection to and from your office and family outings.
