

Residential Vulnerability Assessment

ASSESS – MITIGATE – PROTECT

Protect Your Family!

1 Personal Information Risks – What personal information can people find on the internet and then use against you and your family? We will show you if your home address, social security number, date of birth, and children’s information is available in open sources. If it is, we’ll show you how to remove, scrub, and replace confidential personal information to better protect your family.

2 Physical Security Risks - Experts will assess your home’s vulnerabilities and show you how to improve your family’s safety & security, including assessing:

- o Crime statistics
- o Access Control of Doors & Windows
- o Fencing & Gates
- o Landscaping & Lighting
- o Alarms & CCTV
- o Life Safety Equipment
- o Security Awareness & Safety Training for any Household Staff
- o Emergency Evacuation Plans
- o Recommendations for screening household staff, landscaping staff, contractors, etc.

3 Intruder Defense Training

- o Personal protection measures – discussion
- o Strategies to protect property from public records search
- o An expert will role-play dangerous situations so you and your family are prepared to defend against an unwanted visitor / intruder whose only intent is to cause you harm
- o Learn to utilize resources you already have in your home to easily and effectively protect your family
